

I have seen the overall captioning quality that have deteriorated in the past few years among the local news channels. It has become regular that captioning wouldn't show some or at all. When sports programming completes past the time slot pushing local news back as much as 20-60 minutes, captioning wouldn't show at all on news.

Captioning seems to be on hold for later time. For example, those Dell (girly & goth) and VW (passing power) advertisements show no captioning but in several weeks later, captioning would finally show up.
